GENERAL CHARACTERISTIC OF THE WORK

Master thesis: 60p, 11 figures, 8 tables, 33sources

PHARMACEUTICAL MANUFACTURING, FINANCIAL RISK, RISK CONTROL

The aim of the study: it is to avoid the various consequences of financial risks, and at the same time to improve the management level of the enterprise. In order to achieve the above stated goal, the following steps have been taken: Firstly, this paper introduces the research background and significance. Secondly, chapter one reviews the relevant research and the theory on financial risk control by international and domestic scholars. Thirdly, chapter two introduces Kunyao Company's financial risk control and explains the financial risks and its manifestations, and describes the control measures currently adopted. Fourth, chapter three analyses the inadequacy and causes of financial risk control measures of Kunyao Company. The financial risk control problems can be roughly summarized in this part. Fifth, chapter four puts forward optimized countermeasures for financial risk control of Kunyao Company and reasonable suggestions for Kunyao Company's healthy and stable development. Finally, the research conclusions are drawn according to the previous case analysis and the shortcomings of this paper are explained.

Object of the research: the "Kunyao company" and its financial risk control.

Subject of the research: risk management techniques.

Research methods: this article is based on theoretical analysis, combined with specific cases, using comparative analysis methods to carry out research, as well as graphical and analytical methods, general scientific methods of knowledge, comparative and induction analysis, classification method, measurement method.

Realm of the possible practical application: the proposed solution can be put into practice when formulating the company's financial policy.

The author of the paper confirms that the computational and analytical material provided in the thesis reflects the state of the process under investigation correctly and objectively, and all theoretical, methodological and methodical provisions and concepts are referenced to their authors.
