ABSTRACT

The object of research of the thesis is the phenomenon of zones of pedestrian streets of the city as a communication space, the subject is the specifics of the pedestrian street of Komsomolskaya in Minsk. The methodological basis of the thesis was the general scientific methods: the analysis and synthesis method, the induction and deduction method, historical and genetic and comparative methods, as well as the private scientific methods used in conducting social research (content analysis method).

In the process of writing a thesis, the following results were obtained: the concept of public urban space was examined, the history and prerequisites for its appearance were analyzed, the specifics of communication in urban public spaces were studied, various types of urban public spaces were analyzed and the typology of their classifications was studied, the criteria for creating an urban public space were identified, the space of relations in the modern media city is outlined, an analysis of the public spaces of Minsk and their development plan, revealed the features of the implementation of the idea of public urban spaces in Minsk on the example of Komsomolskaya street.

The novelty of the results is due to the lack of assessment of the functioning of the pedestrian Komsomolskaya street in Minsk as an open public space for communication of citizens. Materials of the thesis can be used in the educational process, in the planning and organization of pedestrian zones as multifunctional spaces, improving the mobility of citizens.

Materials and results of the thesis were obtained on the basis of reliable sources and independently conducted theoretical and practical research. Keywords: communication space, open urban spaces, pedestrian streets, urban planning, communications in the city, media city.

Keywords: communication space, open urban spaces, pedestrian streets, urban planning, communications in the city, media city.
