Minsk, 2021

GENERAL CHARACTERISTICS OF THE WORK

The object of the research: is the financial market and the way that Chinese companies raise funds in the financial market. Taking Xiaomi as an example, analyze the data of various financial indicators after it raises funds in the financial market.

The main goal of the research: is to show that capital is of great significance to the survival and development of enterprises. Analyze and list the financing methods of enterprises in the financial market. Through financing in the financial market, enterprises can obtain funds for continued development. Enterprises adopt corresponding financial strategies according to different development stages, and correctly choose financing methods to meet the funds needed in production and operation activities. And through the case of Xiaomi's IPO, it fully illustrates the important channel for the financial market to provide corporate financing.

The method of the research: this article uses a combination of theoretical analysis and case studies to first study the theoretical basis of corporate capital formation, and in-depth analysis of modern corporate capital structure models.

The Innovation of the research: lies in the analysis of the financial indicators of Xiaomi Group after the IPO, and the full use of financial management indicators, such as the calculation of the company's solvency, profitability, operating ability, development ability and other indicators. The data and opinions have strong timeliness and pertinence. It fully analyzes the significant impact of Xiaomi Group's use of financial market IPO on the development of the enterprise.
