## **GENERAL CHARACTERISTICS OF THE WORK**

Master's thesis on the topic: **FINANCIAL MANAGEMENT IN PROJECTS: IDENTIFYING, MANAGING, CONTROLLING PLANS AND BUDGETS (BASED ON THE RESEARCH OF CROSS-BORDER PAYMENTS PRODUCT OF COMPANY A)** : 50 pages, 23 figures, 1 table.

Keywords: PROJECT MANAGEMENT, FINANCIAL MANAGEMENT, FINANCIAL SYSTEM, PRODUCT DEVELOPMENT CYCLE

The object of the research: financial management system project.

The subject of the research: company A's financial system project establishment process.

The main goal of the research: this article will take cross-border e-commerce company A's financial cross-border payment system as a case study to discuss in depth the project management process in internet financial products, including project definitions, project management of financial products, project risk control and cost control. At the same time, it discovers project management problems in financial software products, and proposes financial software project management strategies based on problem solving accordingly.

To achieve the above-stated goals, the following objectives will be contained: theoretical aspects of financial management in projects; the financial system project design and implementation for company A; countermeasures for improving company A's system.
